SUMMARY

I have over two years of experience as a Frontend Developer, including more than one year at Allied Tajar, where I contributed to the development of ERP software and the company's website. My expertise lies in building responsive, user-centric interfaces, delivering solutions that enhance both functionality and user experience.

PROFESSIONAL EXPERIENCE

Finasal Tech / ERP Developer Aug 2024 - Present

- I currently work as an ERP Developer at a Finasal Tech company, where I use .NET to develop and enhance various ERP modules. My role involves maintaining different ERP modules and adding new modules to improve system functionality and optimize business processes.

Query Provider / Frontend Developer Sep 2023 - July 2024

- I worked as a Frontend Developer at Query Provider, where I developed and maintained multiple responsive and user-friendly websites across various industries. My work included projects such as Point of Sale systems, business websites, and restaurant management systems. I focused on creating user-centric interfaces to enhance usability and user engagement while collaborating with the team to deliver high-quality, functional, and visually appealing web solutions tailored to client needs.

Allied Tajar / Frontend Developer March 2022- Aug 2023

- Worked at Allied Tajar, a company specializing in ERP software development, where I contributed to the development of the company's website and assisted in software projects.

FREELANCE PROJECT

Doner Kebab Albir / Frontend Developer May 2024 - July 2024

- Developed the website for Doner Kebab Albir, a restaurant, showcasing company details and the full menu. I was responsible for designing a user-friendly interface that allows customers to easily browse the menu and learn about the restaurant.

AIFact / Frontend Developer Feb 2024 - April 2024

- Developed the AIFact website, featuring links to various AI tools. I was responsible for creating a clean, user-friendly interface to provide easy access to AI resources.

DIHP / Frontend Developer Dec 2023 - Jan 2024

- I built a job-finding website that allows users to search for jobs and also rent houses. I was responsible for creating an intuitive and user-friendly interface.
